

# ADD IT UP

Huntington  
Museum of Art

We hope you had a great time on your trip to the Huntington Museum of Art – we sure enjoyed having you visit us! We kept you busy with lots of counting, measuring, estimating, and recording, as well as making patterns and graphs. Now let's see how much you remember...

1. What is the name of the room full of plants at the Museum?
2. What are the names of the 2 different scales for measuring temperature?
3. What do we call a pattern that is repeating and has no spaces between the pieces?
4. What material was the big sculpture in the conservatory made of?

Draw A Bar Graph

# ADD IT UP

Huntington  
Museum of Art

Think about the things you saw during your visit to the Museum. Remember the big, colorful sculpture in the Conservatory? Remember the beautiful carved woodwork in the Near Eastern Gallery? Explain how the artists who created these had to use math and measurement in these works of art.

Now, draw a picture of the thing you liked best about your visit to the Museum.
